

YOUR MILLENNIUM FALCON

WORKING LIGHT EFFECTS

Your model includes internal wiring and switchable LEDs that can be connected to an internal battery or external low-voltage power source. Separate systems can be turned on to illuminate the rear sublight drives, forward floodlights and internal cockpit lighting.

MOVING PARTS

The exterior of your model includes a number of fully articulated parts that can be moved into a variety of positions. These include the upper and lower quad laser cannons and rectenna dish. The Falcon's boarding ramp and landing legs are also movable and will lock into either flight position or landing position for display mounting.

WALL OR TABLE MOUNT

The underside of the model includes a concealed mounting plate that allows it to be bolted to a pivoting stand (available as an optional extra) with either a flat baseplate or wall bracket. Either option allows the Falcon to be displayed in a realistic flying attitude, while wall mounting enables it to be fitted out of harm's way. If you prefer not to use the mounting plate, the model will stand on a table on its own landing legs.

STATISTICS

ERA: THE EMPIRE STRIKES BACK (3 ABY)
SCALE: 1:43
LENGTH: 808MM
WIDTH: 596MM
HEIGHT: 192MM
WEIGHT: APPROX 11KG
POWER REQUIRED: SIX AA BATTERIES OR EXTERNAL 9V ADAPTOR (SOLD SEPARATELY)

INTERIOR DETAILS

While the outer shell of the Falcon is exactly like the prop used in the movies, it also features removable upper panels that reveal finely modelled parts of the interior. Based on key scenes from the original trilogy, the internal details include the corridors with their concealed smuggling compartments, plus the main hold with its holographic dejarik game table and engineering station.

COCKPIT INTERNALS

The large scale of the model means that the cockpit is around 100mm long and 80mm in diameter with a fully detailed interior. This includes the fore and aft instrument panels, control console and seats, modelled on the full-size sets used for the movies. The interior is illuminated to reveal the fine detail, which includes glowing instrumentation and other equipment.
